

13 JANUARY 2021

Every business faces ESG risks. Those risks are heightened in a sector defined by natural resource extraction and consumption, but so are the opportunities. The key to addressing these risks is having a good plan. A good plan can lead to more - cheaper financing, better valuations, differentiation, and talent attraction. Not having a plan can lead to exclusion from markets, departing employees, and legal exposure.

In this episode, we talk to Milena Lopez, CEO of Keops Consulting, which provides advisory services around sustainability - projects, origination, and financing - in the commodities sector. Lopez explores what is driving and changing the landscape, what the risks are, and how you can create a plan.

The HC Insider Podcast

Each day, around the world, we have fascinating one-on-one conversations with our connections. Our collaborators are uniquely informed, creative and inspirational in their

fields. We want to provide our community a seat alongside us, listening in to these conversations in that special way podcasting provides, as we tackle topical and people related issues with the leaders and leading minds in our sector.

This article was produced as part of HC Insider. HC Insider is Human Capital's dedicated media service. In addition to providing subscribers with relevant and informative editorials, we also report on people moves in the energy and natural resource world.
