

06 JANUARY 2021

In this episode, we focus on clean hydrogen's current and future role in transportation, from the aerospace industry, to shipping, and roads.

We ask, what is the current state of the technology? Where will we see the biggest opportunities and change, and what infrastructures will be required?

Helping us to navigate the history and future of hydrogen in transportation is Cody Bateman, CEO and Founder of [GenH2](#), whose technologies are revolutionising clean hydrogen delivery at the retail level within transportation. Cody brings 30 years of experience in hydrogen technologies, including work with Nasa and the US Department of Energy.

The HC Insider Podcast

Each day, around the world, we have fascinating one-on-one conversations with our

connections. Our collaborators are uniquely informed, creative and inspirational in their fields. We want to provide our community a seat alongside us, listening in to these conversations in that special way podcasting provides, as we tackle topical and people related issues with the leaders and leading minds in our sector.

This article was produced as part of HC Insider. HC Insider is Human Capital's dedicated media service. In addition to providing subscribers with relevant and informative editorials, we also report on people moves in the energy and natural resource world.
